EDUCATION

- **University of Illinois, Urbana-Champaign** Aug. 2023 - May 2027 (Expected)
 - B.S. in Computer Engineering - Computer Systems Engineering, Analog Signal Processing, Digital Forensics
- **NYU MicroBachelors in Cybersecurity** 2023
 - 1 year program auth/access control, network security, penetration testing, recieved A grade

SKILLS

- **Languages:** TypeScript, Python, C, C++, Java
- **Frameworks:** Next.js, React, Flask, Spring Boot
- **Security & Reverse Engineering:** Burp Suite, Frida, JADX, Wireshark, Nmap
- **Infra & Embedded:** Docker, Kubernetes, Azure, Firebase, Supabase, Vercel, ESP32, Raspberry Pi

EXPERIENCE

- **CS 124 Honors | Lead Web Developer** Aug. 2025 - Present
 - Implemented UIUC SSO login utilizing **CILogon** and Banner API **role mapping**, streamlining access and enhancing platform security
 - Leading **11-person dev team** serving **200+ students**; run weekly meetings, delegate tasks, review pull requests
- **Care Health Insurance | Cybersecurity Intern** Jun. 2025 - Aug. 2025
 - Discovered **60+ unauthenticated internet-exposed services** via external recon; reported findings to drive remediation, securing confidential client data
 - Reverse-engineered **WAF request-signing**; built **replay attack PoC** in **Burp Suite**
 - Performed Android security testing using **Frida + JADX**; Bypassed **SSL pinning** and **root-detection**
- **IoT++ | Software Engineering Intern** Jun. 2024 - Aug. 2024
 - Built real-time fire/smoke detection pipeline using **YOLOv8** for deployment in manufacturing plant camera feeds
 - Improved detection accuracy by **62%** over baseline and **13x** throughput via **pruning + tiling**
 - Deployed **NPU-optimized** inference on Orange Pi using quantization + **GStreamer**
 - Containerized inference with **Docker + Kubernetes** on **Azure**

LEADERSHIP & INVOLVEMENT

- **Illinois MicroTech | External Vice President | HackerFab Member | EOH Project Lead** Oct. 2025 - Present
 - **HackerFab:** Engineering **3-axis stepper-driven** stage with **sub-micron positioning** for wafer photolithography
 - **EOH 2026:** Led Engineering Open House showcase for **20,000+ attendees** as project lead
- **Sigpwny, Cybersecurity RSO | Badge Developer** Jan. 2025 - Sep. 2025
 - Engineered and manufactured a DEFCON-style PCB badge (**250 units**) for a UIUC-hosted CTF even
 - Designed **ESP32 hardware + MicroPython firmware** with SAO modular expansion
 - Built **frame-buffer LCD display stack** and badge **UI/UX**

PROJECTS

- **AlberFlowy** <https://github.com/HackOverflow404/AlberFlowy>
 - Reverse-engineered WorkFlowy private API for full tree CRUD via **Node.js CLI**
 - Built **C++** Albert plugin with **caching + async sync + Google OAuth2 automation**
- **RemoteCam** <https://github.com/HackOverflow404/RemoteWebcam>
 - Built cross-platform **WebRTC** webcam streaming system with **Firebase** signaling
 - **QtPython** Linux client + **Next.js** mobile **PWA** for real-time camera sharing
- **Spotify Wall Art** <https://github.com/HackOverflow404/SpotifyWebController>
 - Repurposed laptop **LCD** with **Raspberry Pi** to build live album-art display
 - Integrated **Spotify API** for real-time track data, lyrics, and animations

PUBLICATIONS

- **Biometric authentication and cybersecurity in the digital age - Publication:** MedCrave
 - Compared **biometric vs traditional** authentication; proposed layered auth model. DOI: 10.15406/bbij.2025.14.00437
- **Evaluation of Leet Speak on Password Strength and Security - Publication:** IJSRST
 - Authored paper on Leet Speak impact on password strength (**834K+ samples**). DOI: 10.32628/IJSRST229567
